

**Independent Auditors' Report on Compliance with
Requirements Applicable to the Passenger Facility Charge
Program, on Internal Control over Compliance, and on the
Schedule of Revenues and Expenditures of Passenger Facility Charges**

New Orleans Aviation Board and the
City Council of the City of New Orleans, Louisiana:

Compliance

We have audited the compliance of Louis Armstrong International Airport (the Airport), a component unit of the City of New Orleans, with the compliance requirements described in the *Passenger Facility Charge Audit Guide for Public Agencies* (the Guide), issued by the Federal Aviation Administration, for its passenger facility charge program for the year ended December 31, 2009. Compliance with the requirements of laws and regulations applicable to its passenger facility charge program is the responsibility of the Airport's management. Our responsibility is to express an opinion on the Airport's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the Guide. Those standards and the Guide require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the passenger facility charge program occurred. An audit includes examining, on a test basis, evidence about the Airport's compliance with those requirements and performing such other procedures, as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the Airport's compliance with those requirements.

In our opinion, the Airport complied, in all material respects, with the requirements referred to above that are applicable to its passenger facility charge program for the year December 31, 2009.

Internal Control over Compliance

The management of the Airport is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws and regulations applicable to the passenger facility charge program. In planning and performing our audit, we considered the Airport's internal control over compliance with requirements that could have a direct and material effect on the passenger facility charge program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of the Airport's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Airport's internal control over compliance.

A *deficiency in internal control* in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with the Guide on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control over compliance such that there is a reasonable possibility that material noncompliance with the compliance of the Guide will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over compliance was for the limited purpose describes in the first paragraph of this section and would not necessarily identify all deficiencies in the entity's internal control that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

Schedule of Revenues and Expenditures of Passenger Facility Charges

We have audited the basic financial statements of the Airport as of and for the year ended December 31, 2009 and have issued our report thereon dated June 29, 2010. Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying schedule of revenues and expenditures of passenger facility charges is presented for the purposes of additional analysis as specified in the Guide and is not a required part of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the New Orleans Aviation Board, the Airport's management, the City Council of the City of New Orleans, Louisiana, the Louisiana Legislative Auditor, and the Federal Aviation Administration, and is not intended to be and should not be used by anyone other than these specified parties. However, under Louisiana Revised Statute 24:513, this report is distributed by the Legislative Auditor as a public document.

Metairie, Louisiana
June 29, 2010

Note to Schedule of Revenues and Expenditures of Passenger Facility Charges

Year ended December 31, 2009

(1) Schedule of Revenues and Expenditures of Passenger Facility Charges

The accompanying Schedule of Revenues and Expenditures of Passenger Facility Charges (PFC) presents the revenues received from the PFC's and expenditures incurred on approval projects. The Schedule has been prepared on the cash basis of accounting under which revenues are recognized when received and expenses are recognized when paid.

PFC's collected represent cash collected through the end of the month subsequent to the quarter-end as reported to the Federal Aviation Administration (FAA) in accordance with 14 CFR Part 158. The interest earned represents the actual interest collected and accrued on the unexpended PFC's during the periods reported.

The approved collection level for the 10 projects denoted by (1) was increased by the FAA from \$3.00 per enplaned passenger to \$4.50 per enplaned passenger, effective April 1, 2002 upon the Airport's submission of Application 02-05 in order to amend the collection level for projects within the PFC program. The collection level for the projects within Application 02-05 remained at \$3.00 per enplaned passenger.

The approved collection level for the 11 projects denoted by (2) was increased by the FAA to \$4.50 enplaned passenger; Effective April 1, 2002, upon the Airport's 02-06. The collection level for the other projects was approved by the FAA at \$3.00 per enplaned passenger, effective April 1, 2002.
